

Anand Bagmar

VP / Head / Director of Engineering*Engineering Strategy · Architecture · AI-Enabled Engineering · Quality · 25+ yrs · Open to FTE, Fractional & Consulting*essenceoftesting.com**Engineering Leadership & Strategy****AI-Enabled Engineering & Quality****Transformation & Enablement****Engineering Executive · Engineering Transformation Leader · Strategic Advisor**

Proven track record spanning 25+ years of improving release confidence, delivery effectiveness, and organisational engineering capability across complex technology environments. Led transformation across 15+ engineering teams, developed 200+ professionals, and created globally adopted open-source solutions. Brings together executive leadership, architectural depth, and practical expertise in AI-enabled engineering and quality.

KEY SKILLS

Engineering Leadership & Strategy — Quality Strategy & Governance · Risk-Based Testing · Test Strategy · Engineering Quality Practices · Software Architecture · Engineering Effectiveness · Team Leadership · Roadmap Definition · Agile & DevOps · CI/CD

Test Automation & Quality Engineering — Test Automation · AI-Driven Testing · Visual Testing · API Testing · Contract Testing · Mobile Testing · Web Testing · Continuous Testing

Tools, Technologies & Programming Languages — Selenium · Appium · PlayWright · Cucumber-JVM · Teswiz · MCP · Specmatic · Gradle · Applitools · ReportPortal · Azure · GitLab · GitHub · Docker · Java · JavaScript · Python

CLIENTS & ORGANISATIONS

AmberPoint | **AmDocs** | **Applitools** | **Borland** | **ChargedUp.green** | **Entain** | **Microsoft** | **Myntra** | **SnapDeal** | **Specmatic**
Srijan | **ThoughtWorks** (*Barclays, McKinsey, COX/OVE, Sears, Sony, Suncorp*) | **Tieto** | **VUClip** | **WebMD** | **Xnsio** (*Play Games24x7, Jio*)

CORE EXPERTISE

Engineering Leadership & Strategy — Defines and matures engineering and quality operating models, governance frameworks, and risk-based practices that align architecture, delivery and quality with business outcomes and delivery confidence.

AI-Enabled Engineering & Quality — Leverages AI to design scalable automation solutions for web, mobile, APIs, desktop, and visual testing — improving reliability and reducing flakiness across CI/CD pipelines.

Transformation & Advisory — Helps organisations assess current practices, build engineering and quality roadmaps, and implement contextual, business-aligned solutions — equally effective in short advisory engagements and longer transformation programmes.

Training, Thought Leadership & Innovation — Trained 200+ professionals across organisations. Conference speaker on AI-enabled engineering and quality strategy. Creator of Teswiz (96 ★ GitHub), WAAT, and TTA — open-source tools used globally.

Cross-Functional Delivery Improvement — Works across product, engineering, and leadership teams to reduce friction, improve predictability, and build scalable, sustainable QA and SDET capability.

PROVEN INDUSTRY IMPACT

Anand has successfully driven quality transformations across telecom, e-commerce, gaming, SaaS, banking/financial services and enterprise platforms, delivering:

- ▶ Scalable automation frameworks across 15+ engineering teams
- ▶ Reduced defect leakage and improved release confidence

- ▶ Architecture built for a 100x scale roadmap - 108,000+ test combinations across API, web and mobile
- ▶ 200+ professionals trained; stronger QA and SDET teams

EDUCATION

MS Illinois Institute of Technology, Chicago · **BE** Pune Institute of Computer Technology

Strategic where it matters, practical where it counts!

Anand helps organisations build engineering capability for the AI era, where architecture, delivery and quality work as one system, whether as a leader, a consultant, or both.
