Quality Leadership & Strategy

Test Automation & AI Quality

Transformation & Enablement

Anand Bagmar is a software quality executive, keynote speaker, and test automation expert with over 25 years of experience leading quality strategy and transformation across complex technology environments. He is open to senior quality engineering leadership roles – FTE or fractional/interim – as well as consulting and advisory engagements — bringing strategic perspective, technical depth, and hands-on leadership to improve product confidence, release performance, and engineering effectiveness. His work spans quality assessments, roadmap definition, automation strategy, and hands-on implementation across telecom, e-commerce, gaming, SaaS, enterprise platforms, and banking/financial services. A Selenium contributor and creator of Teswiz, WAAT, and TTA, he is also a regular conference speaker and writer on software quality and AI-driven test automation.

CLIENTS & ORGANISATIONS INCLUDE

AmberPoint | AmDocs | Applitools | Borland | ChargedUp.green | Microsoft | Myntra | SnapDeal
Specmatic | Srijan | ThoughtWorks (Barclays, McKinsey, Suncorp) | Tieto | Vuclip | WebMD | Xnsio (Games24x7, Jio)

CORE EXPERTISE

Quality Leadership & Strategy — Defines and matures quality operating models, governance frameworks, and risk-based practices that align quality with business outcomes and delivery confidence.

Test Automation & AI-Driven Quality — Leverages AI to design scalable automation solutions for web, mobile, APIs, desktop, and visual testing — improving reliability and reducing flakiness across CI/CD pipelines.

Transformation & Advisory — Helps organisations assess current practices, build quality roadmaps, and implement contextual, business-aligned solutions — equally effective in short advisory engagements and longer transformation programmes.

Training, Enablement & Thought Leadership — Has trained and mentored hundreds of professionals through workshops, bootcamps, and enterprise programmes. Regular conference speaker and writer on software quality and autonomous testing.

Framework & Tool Innovation — Creator of Teswiz (end-to-end automation framework), WAAT (web analytics testing), and TTA (Test Trend Analyzer) — open-source tools used globally by the testing community.

Cross-Functional Delivery Improvement — Works across product, engineering, and leadership teams to reduce friction, improve predictability, and build scalable, sustainable QA and SDET capability.

PROVEN INDUSTRY IMPACT

Anand has successfully driven quality transformations across telecom, e-commerce, gaming, SaaS, banking/financial services and enterprise platforms, delivering:

- ▶ Scalable automation frameworks across multiple platforms
- ▶ Faster, more reliable CI/CD feedback cycles
- ▶ Reduced defect leakage and improved release confidence
- ▶ Stronger, upskilled QA and SDET teams

Strategic where it matters, practical where it counts — Anand helps organisations turn quality into a durable business advantage, whether as a leader, a consultant, or both.
